Period for Reply

A SHORTENED STATUTORY PERIOD FOR REPLY IS SET TO EXPIRE 3 MONTH(S) FROM THE MAILING DATE OF THIS COMMUNICATION.

- Extensions of time may be available under the provisions of 37 CFR 1.136(a). In no event, however, may a reply be timely filed after SIX (6) MONTHS from the mailing date of this communication.
- If the period for reply specified above is less than thirty (30) days, a reply within the statutory minimum of thirty (30) days will be considered timely.
- If NO period for reply is specified above, the maximum statutory period will apply and will expire SIX (6) MONTHS from the mailing date of this communication.
- Failure to reply within the set or extended period for reply will, by statute, cause the application to become ABANDONED (35 U.S.C. § 133).
- Any reply received by the Office later than three months after the mailing date of this communication, even if timely filed, may reduce any earned patent term adjustment. See 37 CFR 1.704(b).

Status

Art Unit: 2829

1. Claims 12-20 are rejected under 35 U.S.C. 112, first paragraph, as containing subject matter which was not described in the specification in such a way as to enable one skilled in the art to which it pertains, or with which it is most nearly connected, to make and/or use the invention.

It is unclear from the specification how the phase delay element is chosen so that a contribution of the at least one phase delay element to the temperature dependence of the sensitivity of the sensor at least approximately compensates for a contribution of a Verdet's constant of the sensor fiber to the temperature dependence of the sensitivity of the sensor. What are criteria for this selection?

In claims 13-18, it is unclear from the specification what fact/details/information/equation has to be based on in order to obtain a phase delay element with such conditions in these claims.

Furthermore, it is unclear from the specification what "TW", "TV" and "SK" are and how these values are obtained, therefore the graphs of figures 2-3 are not well understood.

It appears that the specification does not provide sufficient critical support for the reason why such selection for the phase delay element is acceptable. It appears that the selection is based upon different trials and error in order to make such selection.

2. Since claims are indefinite, no art has been applied to these claims .

3. The prior art made of record and not relied upon is considered pertinent to applicant's disclosure.
